

Go from idea to production **in just 1 month**

Join our 1-month implementation program and bring your first AI-powered automation to life with Appmixer.

 By the end of this sprint, you'll have a production-ready use case embedded in your application—ready to ship to your users.

What's included - We'll work side-by-side with your team to:

1

Deploy Appmixer on your infrastructure

2

Create all required connectors
(including custom ones for your app)

3

Embed Appmixer UI widgets seamlessly into your application

4

Set up user authentication and access control (ACL)

5

Design and build agentic workflows or reusable integration templates

How it works

Kickoff workshop

We start with a deep dive into your requirements to define the use case and scope.

Weekly syncs

We meet weekly to align, review progress, and ensure on-time delivery.

Final delivery

Within 1 month, you'll ship AI-powered automation in your application.

1

2

3

1 month program

Always-on collaboration

Stay connected in a shared Slack channel with our engineers throughout the project.

Investment

Flat fee: \$9,000 USD

No surprises. Just a fully supported implementation from idea to delivery.

Your investment includes the **dedicated work of our solution engineer, connector team, and project manager**—ensuring you get expert support every step of the way.

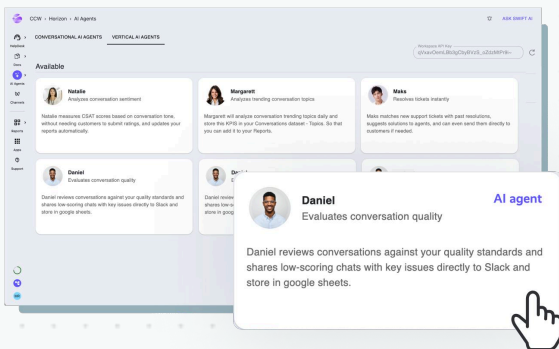

Ready to build?

Let's create something your users will love—fast.

From zero to AI agent marketplace in one month, achieving a 782% ROI

"Within a month, we had a production-ready platform. We saved at least \$150K in R&D and avoided a year-long delay to market. This gives us a significant edge in the crowded CX space."

Marian Rydzanych
CEO, Intelswift
